Attachments: Document1 w SAK Edits 5 30 14.docx

Good afternoon everyone,

Attached are our requested amendments/ changes to the draft language in order to address **our request for a PLA.**

The language provides that if the design-build authority is utilized a **PLA would be required.** The PLA is to be negotiated locally with the corresponding Building Trades Council(s).

Its straightforward, but please contact me if you have any questions or feedback.

We look forward to working with the all those involved.

Cesar

Lew, the problem is we believed we were submitting language for the County to approve. We are not sure what was proposed will fly at the State. The State Building Trades is working on something and will submit within the next day or so. What we are looking for is a commitment by the County and I will deliver the message on Tuesday. When will the Bd of Supes decide on the action being proposed by the Supes of the Agency? Ron
